

Leashaw landslip update

Issue 14

10 June 2024

New signs

You may start to notice new signs that we are placing locally to try and help local businesses. We met with several of the businesses and the parish council a few weeks ago to work out what everyone thought would help to improve the numbers of customers.

The signs are with the manufacturers and we'd expect them to be up within the next few weeks.

Ground investigation work set to start

Work on the geotechnical ground investigation will start from 24 June and last for around three weeks, so you may start to see employees on site.

Before that our highways team will be on site to clear some of the vegetation.

We expect the ground investigation report back around four weeks after the work completes, and this should give us more information so we can start to plan the repair design.

Budget for the repairs

We have continued to raise the issue of funding for this landslip, and the others we currently have in the county with the Government, though this is now on pause for a while during the election period.
